I. INTRODUCTION

This Unified Planning Work Program (UPWP) is a mechanism for listing and organizing the Mid-Region Metropolitan Planning Organization's transportation planning activities that will be undertaken during the time period covered. This document was developed in accordance with federal regulation 23 CFR 450 and FTA Circular 8100.1C.

A. MRCOG General Overview

The Mid-Region Council of Governments (MRCOG) is a regional planning organization that develops policies and makes decisions about transportation planning in the greater Albuquerque region of New Mexico. It is a forum for cities, towns, villages, tribal governments, counties, transit agencies, and state agencies to address common regional issues.

MRCOG includes several organizational divisions such as the Mid-Region Metropolitan Planning Organization (MRMPO), Mid-Region Rural Transportation Planning Organization, Workforce Connections of Central New Mexico, Water Resources Management, Local Planning Assistance, and Economic Development-District 3. Several of these programs, including MRMPO, have their own governing bodies. In addition, MRCOG administratively houses the Rio Metro Regional Transit District under agreement with that district to provide staff, payroll services, office space, and other administrative functions.

B. Transportation Planning

Federal law requires that every metropolitan area with a population over 50,000 have a designated Metropolitan Planning Organization (MPO) to qualify for receipt of federal highway and transit funds.¹ MRCOG is designated as the Metropolitan Planning Organization (MPO) for the Albuquerque Metropolitan Planning Area (AMPA) which is a Transportation Management Area (TMA) as well. MRMPO employees provide planning, coordination, and administrative support to the Mid-Region Metropolitan Transportation Board (MTB), which is MRMPO's policy-making body. Work tasks and responsibilities with respect to transportation planning for the MPO are detailed in this document, the Unified Planning Work Program. Refer to Appendix B for a map of the AMPA/TMA.

In addition, under state law MRCOG is designated as the Rural Transportation Planning Organization (RTPO) for Tarrant County, portions of Sandoval County and the southwest corner of Santa Fe County that includes the Town of Edgewood. Work tasks for planning activities in the RTPO are documented in a separate document, the Annual Work Program for the Mid-Region RTPO.

C. Governance, Boards, and Committees

MRCOG is governed by the MRCOG Board of Directors. The Board is composed of locally-elected and appointed officials. Member agencies may select senior staff members to serve as alternates. MRMPO is a division of MRCOG per the *Memorandum of Operations of the Mid-Region Metropolitan Planning Organization* which establishes the parameters for the operation of the MPO.

¹ 23 USC 134(d).

The Mid-Region Metropolitan Planning Organization (MRMPO) as a division of MRCOG is governed by the Metropolitan Transportation Board (MTB) which is composed of elected and appointed officials and agency representatives from within the Albuquerque Metropolitan Planning Area as well as representatives from the New Mexico Department of Transportation. Membership, officers and voting procedures are in accordance with the Bylaws adopted by the MTB. Standing and ad hoc committees provide the MTB with guidance on matters related to funding, congestion management, bicycle and pedestrian issues, intelligent transportation systems, transit, freight, roadway access management, land use and transportation integration, and other specific matters related to transportation planning.

D. Unified Planning Work Program Requirements

A Unified Planning Work Program (UPWP) must be developed by each MPO in cooperation with the state and public transportation operators² which identifies the work of the MPO over a one or two-year period. The development of the UPWP is the joint responsibility of the MPO, State DOT, other state departments, public transportation operators and other planning and implementation agencies. The UPWP must identify work by major activity and task including those that address the planning factors in 23 CFR 450.306(b) which are listed in section G, below. Other requirements are that a discussion of planning priorities facing the metropolitan planning area must be included. In New Mexico, all MPOs and NMDOT have agreed to utilize a common format for their UPWP documents, base their work program on the federal fiscal year (FFY) and produce two-year work programs. This UPWP meets those and all federal requirements and covers a two-year period.

The UPWP developed by an MPO must include:

- a description of the work to be accomplished;
- who shall perform the work for an activity/task;
- a schedule for completing the activity/task;
- resulting products of the activity /task;
- proposed funding by activity/task;
- a summary of the total amounts and sources of federal and matching funds³;
- identification of any incomplete work elements/activities carried over from previous fiscal years; and
- a summary of the work program that shows federal share by type of fund, matching rate by type of fund, state and/or local matching share and other state of local funds.
- MPO's in TMAs must include (as applicable) cost estimates for transportation planning, research, development, and technology transfer related activities funded with other federal or state and/or local funds, particularly for producing the FHWA-required data (i.e., data for preparing proposed legislation, evaluating the performance of the Nation's transportation systems, etc.) for planning for other transportation modes.

E. The UPWP Development Process and Opportunities for Public Input

The public may participate in the development of the UPWP in a few ways. The public is welcome to attend MRMPO's MTB meetings which are held on a monthly basis and are open to the public. To learn more about these meetings, please contact Ms. Barbara Thomas at (505) 247-1750 or email at bthomas@mrcog-nm.gov. The public can also review the draft document during the 30-day public comment period. During this time, an electronic copy of the UPWP will be posted on the MRCOG website at www.mrcog-nm.gov. Additionally, information in the *MRMPO Public Participation Procedures* can also be found at www.mrcog-nm.gov.

Revisions to the UPWP are required periodically to accommodate new tasks, award of funding grants and changes in work priorities. Administrative amendments are those resulting in minor changes with formal amendments for more significant changes. Formal amendments are scheduled, if needed, on a quarterly basis with the approved UPWP amendment submitted to NMDOT-Planning in the last month of each Federal Fiscal Year Quarter (December, March, June & September). Opportunities for public comment on UPWP amendments are available at any board meeting at which the item will be discussed. Agendas for all Metropolitan Transportation Board meeting are posted online at www.mrcog-nm.gov.

F. Funding Sources for Transportation Planning Activities

Transportation planning efforts in the metropolitan area are financed primarily through federal funds. (FHWA Section 112 funds, FHWA State Planning and Research (SPR) grant funds, FTA Section 5303 funds.) Funds from local jurisdictions provide the required matching funds to receive the federal funds. Local funds also provide additional funds for transportation planning purposes. Occasionally, state funds or grants are used for general transportation planning. Special federal planning grants for specific programs are also utilized when the MPO is awarded these types of funds.

G. Planning Factors Under Federal Law

The newest transportation bill, Funding America's Surface Transportation (FAST) and the previous bill, Moving Ahead for Progress in the 21st Century (MAP-21), continues the planning factors identified by the previous transportation bill, the Safe, Accountable, Flexible, and Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU). The planning factors as stated in MAP-21 are:

- Support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
- Increase the safety of the transportation system for motorized and non-motorized users;

- Increase the security of the transportation system for motorized and non-motorized users;
- Increase the accessibility and mobility of people and for freight;
- Protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local *planned* growth and economic development patterns;
- Enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
- Promote efficient system management and operation; and
- Emphasize the preservation of the existing transportation system.

H. Planning Priorities for the Metropolitan Planning Area

Planning priorities for the Mid-Region MPO include the following:

- Developing the updated metropolitan transportation plan (MTP), *Connections 2040* and associated Transportation Improvement Programs (TIP) for FFY 2020-2025 and FFY 2022-2027.
- Addressing river crossing congestion through mode share targets. This goal is supported by 25 percent of all STP-U funds being set aside for transit projects on the priority transit network to help address the region's river crossing congestion issues.
- Engaging the region in scenario planning to help guide growth in a way that better meets regional goals.
- Continuing a Project Prioritization Process that helps to objectively prioritize projects that most meet regional needs.
- Ensuring federal funds are obligated to the fullest potential through the Transportation Improvement Program process and also that the public is more fully engaged in this process.
- Improving the MPOs outreach and incorporation of environmental justice considerations as part of the long-range transportation planning process
- Enhancing the incorporation of Intelligent Transportation Systems (ITS) in regional transportation projects as well as interagency cooperation regarding ITS. This includes the final design and construction of the Regional Transportation Management Center.
- Implementation of the Central Avenue Corridor Bus Rapid Transit, a.k.a. Albuquerque Rapid Transit (A.R.T.).
- Improving public and member agency access to MRMPO data and other products, particularly through interactive visualization tools available on the MRCOG website.
- Developing design guidelines that promote Complete Streets design concepts and roadway configurations that match their surrounding land use context.
- Facilitate the integration and coordination of land-use planning efforts by area agencies with transportation planning undertaken by area agencies and MRMPO.

Revise the TIP to accommodate increased or decreased funding, to delay or advance projects as progress monitoring dictates. Revisions fall into two categories: TIP Administrative Modifications which are minor revisions and TIP Amendments which require approval by the Metropolitan Transportation Board.

Responsibilities: MPO staff manages the TIP and processes TIP Administrative Modifications. TIP Amendments are processed upon recommendation and analysis of the TPTG (Transportation Program Technical Group), and the TCC (Transportation Coordinating Committee).

Task 3 - General Development and Data Collection/Analysis (FTA Tasks 442200 and 442500 as noted)

This consists of general planning activities, data collection, socioeconomic projections, mapping services, orthophotography, travel demand/traffic forecasting, development review, and local assistance.

Estimated Cost for Task 3

FFY	Est. Staff Hrs.	Avg. Rate	Staff Cost	Consultant Costs	Other Costs	Est. TOTAL
FFY 2019	15,000	\$25.60	\$384,000	\$145,000	\$104,725	\$633,725
FFY 2020	15,000	\$26.55	\$398,250	\$460,000	\$103,725	\$961,975

"Other Costs" includes traffic count equipment, fuel & vehicle costs for traffic count program, van replacement (when purchased), software upgrades, software subscription fees, etc. Consultant costs include the orthophotography contract in even years. Cost of new traffic count van included in FFY 2019 and new server in FFY 2020. (Employee benefits and indirect costs per Cost Allocation Plan are not included.)

3.1 Traffic Counting and Reporting (FTA Task 442400)

Collect and process traffic data for routine monitoring of the transportation network, report data to NMDOT and conduct special needs traffic counts as needed. Counts are collected on all major roads in the MRCOG region (Bernalillo, Sandoval, Valencia and Torrance counties and southern Santa Fe County) for a total of approximately 3000 count locations. Each location is counted once every three years (approx. 900-1000 counts/year) and all counts are reviewed to confirm they meet the *Highway Performance Monitoring System* standards of FHWA and the *New Mexico State Traffic Monitoring Standards*. Occasionally, counts scheduled may be delayed or rescheduled due to roadway construction, weather issues or equipment problems. MRCOG usually conducts approx. 95% of its scheduled counts.

Data collection is conducted system-wide as well as targeted locations and includes traffic counts, directional volume data, vehicle classification (approximately 1/3 of all counts), bicycle counts, pedestrian counts, and intersection turning movements. Data is archived and logged into the traffic counts database and shared with local agencies for use in transportation planning activities. The traffic count program unit operates servers to receive traffic data from member agencies' ITS networks (including NMDOT-ITS). All reports and analyses are made available to member agencies and the general public. Funds are required to run the program and allow for the timely replacement of the traffic counting vehicle (approx. every 5-6 years) and counter machines (approx. every 10-15 years).

Responsibilities: MPO staff and other agencies as necessary. NMDOT transmits count information and Highway Performance Monitoring System (HPMS) data to FHWA.

3.3 Travel Demand Model Management and Maintenance (FTA Task 442200)

The MPO currently uses CUBE as the travel demand modeling program. Model runs are conducted upon request from various agencies and for development of the Metropolitan Transportation Plan (MTP) and the Transportation Improvement Program (TIP). Updates are done periodically, to the model's socioeconomic and demographic data, the roadway network and transit network. This task includes integration of the travel demand model with Congestion Management Process (CMP) data, the land use model and the economic analysis model along with calibration and validation of the model(s). This includes integration and update of traffic count data into the travel demand model. Additionally, included is coordination with NMDOT to ensure alignment of inputs and outputs between MRMPO's model and the statewide model.

This task is primarily the purchase and installation of major new software and upgrades of existing software from the various companies. Often training by the software manufacturer is required to implement and fully utilize the software. This includes integration of the various planning tools such as the accessibility, economic analysis, land use, and travel demand models, TranSight®, UrbanSim® and UrbanCanvas®, TAQA (Transportation Analysis and Querying Application) tool, CMP data, traffic count data (under task #3.1), and other programs.

3.7 Development Review (FTA Task 442400)

The MPO will assist local and tribal agencies with reviews of development plans and traffic forecasts as requested. Plans will be reviewed for consistency with the MTP, TIP, CMP, ITS Architecture, and other pertinent planning documents and plans.

Forecasts requested by developers must be brought to the attention of the MPO through one of the agencies. Furthermore, the MPO will not perform a Traffic Impact Analysis (TIA) or Traffic Impact Study (TIS) for developers. Developers may obtain information the MPO has already compiled or collected.

The MPO facilitates the Roadway Access Committee (RAC) which reviews requests for modifications to the *Roadway Access Modification Policies for the Albuquerque Metropolitan Planning Area* and *Inventory of Roadway Access Limitations*. The RAC manages the limited access roadway system and reviews requests from any jurisdiction with ownership of an access controlled roadway and issues a recommendation to the Transportation Coordinating Committee (TCC). RAC activities are related to proposed developments and are included under this task.

3.8 Orthophotography (FTA Task 442200)

This is a biennial task led by the MPO to work with state, federal, tribal, and local agencies and other interested parties to acquire and distribute regional digital orthophotography and digital elevation data. The MPO manages a contract for services to acquire orthophotography every two years. Orthophotos are used for mapping and geographic information technology applications, to update land use inventories, establish modeling network alignments, and evaluate the feasibility of transportation alternatives, as well as for public involvement activities.

The work for FFY 2019 includes any remaining work from FFY 2018 including payments invoiced after October 1, 2018. A possible additional task may include contracting with a

vendor to produce new LiDAR imaging for the area if various federal, state, local and tribal agencies are interested in funding this task; this is generally undertaken every 4-6 years.

In FFY 2020 the MPO will collect funding from various federal, state, tribal and local agencies, contract with a vendor to produce aerial orthophotography, and review and process aerials.

Responsibilities: MPO staff serves as lead with principal responsibility for coordinating and planning for digital orthophotography missions in the region. Project participants vary for each cycle. Prior participants have included: City of Albuquerque, Albuquerque Metropolitan Arroyo and Flood Control Authority, Bernalillo County, Albuquerque-Bernalillo County Water Utility Authority, Kirtland Air Force Base, Village of Los Lunas, Middle Rio Grande Conservancy District, NMDOT, City of Rio Rancho, Sandia National Laboratory, Sandia Pueblo, Santa Ana Pueblo, Southern Sandoval County Arroyo and Flood Control Authority, the U.S. Geological Survey, U.S. Bureau of Reclamation, and Valencia County.

It also includes the Congestion Management Process (CMP), Intelligent Transportation Systems (ITS) planning, safety analyses, and other short to medium range planning activities.

4.1 Metropolitan Transportation Plan (MTP) & Metropolitan Transp. Planning

Metropolitan transportation planning is a continuous, comprehensive, and cooperative process. The Metropolitan Transportation Plan (MTP) forms the basis for all transportation planning and projects within the metropolitan planning area. The MTP is the long-range transportation plan for the metro area and covers all modes of transportation that may serve the current and future needs of the region. The plan conforms to federal regulations as set forth in 23 CFR 450. The MTP is updated every four to five years and may be amended, if necessary, as required. Work on the *Connections 2040 MTP* update will begin in late 2018 with increasing activity in FFY 2019 and FFY 2020. This is a reoccurring core activity of the MPO.

Included in this task is development and analyses of alternative transportation scenarios, the establishment of performance targets and measures and coordination with public transit providers in establishment of transit asset management targets and measures. (Performance monitoring and analysis is under task #4.9.)

Responsibilities: MPO staff serves as the lead agency. The development of the MTP is a cooperative effort by the MPO and its member agencies, tribal governments, NMDOT, and area transit agencies, with coordination and input from several other agencies such as: FHWA, FTA, "land use" planning agencies (i.e., municipal planning departments), City of Albuquerque Environmental Health (for air quality), U.S. Environmental Protection Agency, Kirtland Air Force Base, and other agencies as necessary

4.3 Congestion Management Process (CMP)

The MPO will collect data to monitor system-wide and link-based performance to investigate recurring and nonrecurring congestion. The CMP uses performance data to determine the cause and severity of congestion in the region. The CMP is used at various levels of planning and operational analyses such as the MTP, TIP and development of individual projects. The CMP is integrated into the metropolitan planning process and provides comprehensive information on the performance of the transportation system so residents, elected officials, and agencies can make informed decisions based on congestion levels and location appropriate strategies. This is an ongoing core activity of the MPO.

Included in this task are "Alternative Scenario Development and Analysis" and/or "Before & After Studies" these are evaluations of the impacts of selected, recently implemented projects. This type of analyses will be used for evaluation of the MTP performance measures under MAP-21 and the FAST Act. Also included in this task is integration of the CMP with ITS documents and efforts, the MTP, and the TIP project selection process. The MPO every other year, purchases mobile source travel time data to continue to assess roadway conditions in the region and levels of congestion; this data is integrated into the Transportation Analysis and Querying Application (TAQA) and the congested corridor rankings.

Responsibilities: MPO serves as lead in coordination with member agencies, regional transit providers and NMDOT.

4.5 Land Use/Transportation Integration

MPO staff have been working on improving coordination between land use and transportation planning with member governments. This work has been initiated and overseen by the MPO’s Land Use and Transportation Integration (LUTI) Committee. MRMPO has now begun implementation of coordinated land use and transportation planning through the scenario planning process included in the current 2040 MTP. This includes the development and analysis of several conceptual growth scenarios to help determine a preferred way the region would like to grow, and recommended strategies to achieve a “preferred growth scenario”. These efforts will continue and will be reviewed and refined during development of the MTP update, *Connections 2040*.

The MPO will provide technical assistance in the areas of economic analysis, alternative scenarios and activity center analyses per the 2040 MTP.

Responsibilities: MPO staff-led effort with strong member agency involvement.

Finalize any uncompleted aspects of the project. The USDOT awarded a Transit Oriented Development (TOD) Planning Grant that complements the Albuquerque Rapid Transit (ART) project for developing a TOD planning framework with the goal of achieving \$2 billion in real estate investment in the Central Avenue corridor and \$1 billion in cost of living reduction from savings to households able to make use of an improved transit system. The effort will also inform and support inter-agency coordination for TOD along the future University Blvd. Bus Rapid Transit Corridor. The project will capitalize on the recent "ABC-Z" project which updates the City/County Comprehensive Plan and revised zoning through a new Integrated Development Ordinance (IDO). This effort specifically addresses and analyzes issues related to implementing transit oriented development in the corridor and recommend changes to the Comprehensive Plan and the IDO necessary to facilitate TOD. Most work on this project was undertaken in FFY 2017 and 2018; some final work and invoice billing remains in FFY 2019.

Responsibilities: MPO staff will assist City of Albuquerque Planning and Transit Departments as requested.

Source of Funds: FTA 5303, Local Funds for Match (Funds were awarded directly to the City of Albuquerque not the MPO. ABQ Ride will provide MRMPO with quarterly status reports).

Note: The SPR funds were revised to delay purchase of a new traffic count van until FFY 2020 if funds are available.

Note: The PL Funds & 5303 funds will be monitored as each quarter's budget is analyzed. Expenses will be shifted to local funds sources and/or reduced if necessary. Expenses (particularly salary timesheet charges) will be shifted from one fund source to another if necessary.

Note: The PL Funds, FTA 5303 & SPR funds sources (052, 053 & 067) are shown with a minor "surplus" at the end of FFY 2019. This is intentional because each year, the indirect cost rate may increase or decrease as will estimated costs for certain items. Any balance of Transportation Assessment (068) funds will be carried over to FFY 2021.

Note: The orthophotography project is budgeted with a balance due to the uncertainty of the cost of the vendor contract; any unexpended funds will carryover to the next biennial orthophotography project. This item is dependent upon various agencies contributing to the cost of the project. Only \$42,720 of federal funds are used for this project which, along with matching funds, constitutes NMDOT's participation to the project.

Notes on Budget:

Carryover amounts are estimated based on the preliminary carryover amounts shown for FFY 2019. These amounts will change at the end of FFY 2019 when actual carryovers are known.

Federal funding amounts and associated matching funds are based on the amount received in FFY 2019 and will change pending approval, by Congress, of an appropriations bill for FFY 2020 when actual amounts will be known.

The FFY 2020 budget was prepared with an "indirect cost" rate of 25.5%. This changes annually and will be adjusted once the 2020 rate is established.
